Forecast for Wednesday 31 Jan 2024

Weather: Cloud thickening during the morning, but remaining largely dry. Drizzle is likely to become persistent as cloud lowers during the afternoon, with rain, heavy at times, during the evening. Strong to gale force southwest winds developing over the summits with a significant wind chill.

Maximum wind: Southwest 35 to 40mph gusting 55mph in the afternoon.

Chance of cloud-free hill tops 600m: 60% lowering to 20% for the afternoon and evening.

Low cloud and visibility: Extensive cloud, base around 600-800m, lowering towards 300-400m in the afternoon. Visibility often moderate to very poor in rain and hill fog during the afternoon and evening, but good or very good early in the day except in any summit cloud.

Temperature: **Valleys:** Plus 2 rising to 9 Celsius during the day.
At 600m: Zero Celsius rising to Plus 3 Celsius in the afternoon
Freezing level: Around 600m at first, rising above the summits by midday.
